OBJECTIVE

Motivated Computer Applications postgraduate seeking an entry-level software development role where I can apply my technical skills, problem-solving abilities, and passion for building scalable applications.

SUMMARY

MCA postgraduate with hands-on experience in MERN Stack development, Python, and Data Analytics. Built AI-powered web applications, interactive Power BI dashboards, and Excel-based business intelligence solutions. Skilled in Generative AI, SQL, data visualization, dashboard development, and full-stack application development with a strong interest in Python and Data Analytics.

EDUCATION

Master of Computer Science 2023 - 2025

Bhoomaraddi College of Engineering and Technology, Hubballi

CGPA: 7.11

Bachelor of Computer Science 2020 - 2023

SilverOak University, Ahmedabad

CGPA: 7.85

SKILLS

Programming & Web Technologies: Python, HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, MERN Stack, MySQL, PHP, Django

Data Analytics: Microsoft Power BI, Advanced Excel, Tableau, SQL, Data Cleaning, Data Visualization, Dashboard Development, DAX, Time Series Forecasting

AI & Tools: Generative AI, Prompt Engineering, API Integration, AI-based Text Summarization, Transcript Processing, Git, GitHub, Postman, Version Control

Design: Figma, Adobe XD

WORK HISTORY

UI/UX Intern Feb 2023 - May 2023

Sparks to Ideas

Ahmedabad, Gujarat

PROJECTS

AutoMindMap — MERN Stack, MongoDB, Gemini API

- Developed an AI-powered web application that converts text and video transcripts into concise summaries and interactive mind maps.
- Built REST APIs, integrated frontend and backend modules, and managed data using MongoDB.
- Integrated Gemini API for AI-generated summaries and improved application performance through testing and debugging.

Feedback Analytics System — MERN Stack

- Developed a faculty feedback management system with secure student authentication and role-based access.
- Implemented feedback submission, database integration, and analytics dashboards.
- Performed functional testing and ensured smooth client-server communication through REST APIs.

Super Store Sales Forecasting Dashboard — Microsoft Power BI, DAX

- Designed an interactive Power BI dashboard to analyze sales performance using KPIs, regional trends, shipping methods, and year-over-year analysis.
- Cleaned and transformed sales data, created DAX measures, and developed dynamic visualizations for business reporting.
- Implemented a 15-day time series sales forecasting model using historical data to support business decision-making.
- Delivered insights into customer behavior, top-performing products, sales regions, and revenue trends.

Vrinda Store Annual Sales Dashboard — Microsoft Excel

- Built an interactive Excel dashboard to analyze annual sales performance using Pivot Tables, Pivot Charts, Slicers, and data visualization techniques.
- Performed data cleaning and preprocessing to ensure accurate reporting and analysis.
- Analyzed customer demographics, sales channels, monthly sales trends, order status, and top-performing states.
- Generated actionable insights that support data-driven business decisions and improve sales strategy.

CERTIFICATES

- Digital Skills: Artificial Intelligence
- Full Stack Development using Java – Apponix Technologies
- CODEHER Hackathon Participation Certificate
- upGrad: Generative AI Certificate
- Complete Full-Stack Web Development Bootcamp – Udemy
