OBJECTIVE

Motivated Computer Applications postgraduate seeking an entry-level software development role where I can apply my technical skills, problem-solving abilities, and passion for building scalable applications.

SUMMARY

Postgraduate MCA student with hands-on experience in full-stack web development (MERN stack) and UI/UX design, and a strong interest in Python development and Generative AI. Worked on AI-enabled applications involving text analysis, summarization, and data visualization using modern frameworks and APIs. Possess a solid foundation in frontend development, backend integration, and collaborative project work, with a growing focus on building intelligent, scalable solutions using Python.

EDUCATION

Master of Computer Science Bhoomaraddi College of Engineering and Technology, Hubballi CGPA: 7.11	2023 - 2025
--	-------------

Bachelor of Computer Science SilverOak University, Ahmedabad CGPA: 7.85	2020 - 2023
--	-------------

SKILLS

Programming & Web Technologies: HTML, CSS, JavaScript, React.js, Python, Gen AI, Node.js, Express.js, MongoDB, MERN Stack, MySQL, PHP, Django Java

AI & Tools: AI-based text summarization, transcript processing, API integration, Prompt Engineering, Postman, Git, Version Control

Design & UI/UX: Figma, Adobe XD

WORK HISTORY

UI/UX Intern Sparks to Ideas	Feb 2023 - May 2023 <i>Ahmedabad, Gujarat</i>
--	--

PROJECTS

Automindmap Developed and maintained a full-stack MERN application that converts text and video transcripts into AI-generated summaries and visual mind maps. Designed REST APIs, implemented backend logic, integrated frontend components, tested functionalities, and participated in debugging and performance optimization.

Feedback Analytics Designed and built a web-based faculty feedback system using MERN stack. Implemented student authentication, feedback submission modules, database integration, and analytics dashboards. Performed functional testing and ensured smooth data flow between client and server.

CERTIFICATES

- Digital Skills: Artificial Intelligence
- Full Stack Development using Java – Apponix Technologies
- CODEHER Hackathon Participation Certificate
- upGrad: Generative AI Certificate
- Complete Full-Stack Web Development Bootcamp – Udemy
